† These local unit trusts may offer investors offshore exposure when appropriate/in line with regulation.

These funds comply with Regulation 28 of the Pension Funds Act.

* This fee includes the fees and costs relating to underlying global asset class exposures, which range between 0.20% and 0.50% as the fee for equity exposures is typically higher than the fee for fixed income or money market exposures.

The initial adviser fee will be between 0% and 3.00% (ex VAT). Please refer to the respective Minimum Disclosure Document for more detail.

The Total Expense Ratio (TER) is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TER's.

Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The TER and TC cannot be determined accurately for the funds that are less than one year old. Calculations are based on actual data where possible and best estimates where actual data is not available.

The total investment charge consists of the TER and TC.

You will receive confirmation of your Effective Annual Cost (EAC) in writing once your investment has been processed.
