FUND OBJECTIVE

The portfolio is primarily aimed at investors seeking high levels of income and capital preservation. The portfolio is invested in a blend of South African managers who may invest in money market instruments including highly secure bank issued instruments and short-dated government guaranteed instruments as well as issues by central, provincial and local governments, companies and banks. The portfolio aims to outperform cash over a rolling one-year period.

REGULATION 28 COMPLIANCE

The fund is not required to be Regulation 28 compliant in terms of its Deed, but the fund manager is mandated to comply with Regulation 28 on a day-to-day basis.

MINIMUM INVESTMENTS

LOW BALANCE CHARGE

Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge* of R31 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, or the investment is through a platform such as Old Mutual Wealth, the Low Balance Charge will not apply. Please refer to the link for a full disclosure on how the Low Balance Charge will apply to your investments.

*This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

ONGOING

	Class A	Class B4*
Annual service fees (excl. VAT)	0.50%	0.25%

Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

* Please note: Class B4 is available through investment platforms such as Old Mutual Wealth.

Total Expenses (Incl. Annual Service Fee) (30/06/2026)	36 Months		12 Months	
	Class A	Class B4*	Class A	Class B4*
Total Expense Ratio (TER) Incl. VAT	0.62%	0.34%	0.62%	0.34%
Transaction Cost (TC)	0.01%	0.01%	-	-
Total Investment Charge**	0.63%	0.35%	0.62%	0.34%

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

* Please note: Class B4 is available through investment platforms such as Old Mutual Wealth.

** This includes:

- The service fee of underlying funds.
- Where underlying funds charge implicit performance fees, unit holders may carry these performance fees regardless of whether the top tier fund or mandate has outperformed its own performance fee benchmark.
- Other charges incurred by the underlying funds, which are deducted from their portfolios.

Funds are also available via Old Mutual Wealth and MAX Investments.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Multi-Managed Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- A money market fund is not a bank deposit account. Its unit price aims to be constant but investment capital is not guaranteed. The total return is primarily made up of interest (declared daily at 13:00) but may also include any gain/loss on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in the case of abnormal losses, it can have the effect of reducing the capital value of the fund. The published yield is calculated using the average of the fund's previous seven days' net income (and assumes all income was reinvested). This figure is then annualised, which is the weighted average compound growth rate. Excessive withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed.
- Old Mutual Unit Trust Managers (RF) (Pty) Ltd is the manager of this co-branded fund and has full legal responsibility for it.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 September 2026. Source: Morningstar.
