Class B1	OMCMB1	ZAE000251963

FUND OBJECTIVE

The fund aims to achieve long-term inflation-beating growth from a cost-efficient balanced portfolio with an equity exposure typically displayed by multi-asset medium equity portfolios conforming to the regulations governing retirement fund investments.

WHO IS THIS FUND FOR?

This fund is suited to investors wanting moderate long-term growth in a cost-efficient multi-asset medium equity fund with less volatility in the short term compared to a pure equity fund. The fund is suitable as a stand-alone retirement investment.

INVESTMENT MANDATE

The fund is exposed to all sectors of the market (shares, bonds, property and cash) with a maximum of 60% exposure to equities and may gain exposure to foreign assets up to a maximum of 45% of its portfolio. The fund will have a minimum exposure of 50% to passively managed underlying securities. Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

Global equities were mixed in the third quarter as investors weighed higher interest rates, elevated oil prices and ongoing Middle East tensions. Leadership rotated away from technology toward energy, financials and healthcare, while concerns about the scale of AI investment and emerging cybersecurity risks weighed on tech shares. Bonds struggled as yields rose, and commodities rallied on energy strength.

US equities continued to climb, supported by strong corporate fundamentals and economic growth despite multiyear-high Treasury yields and doubts about the sustainability of the AI trade. Equities rose 2% for the quarter, with mega-caps leading (up 4%) while mid and small caps lagged, falling 6% and 8% respectively. Energy was the strongest sector, up 17%, while rate-sensitive utilities fell 12%. The 10-year Treasury yield reached 5% for the first time since 2007 as inflation worries, fiscal deficit concerns and tighter monetary policy pushed bond prices lower. Leveraged loans were a bright spot, gaining 2% thanks to their floating-rate structure.

European shares slipped in September, leaving regional equities down 1% for the quarter, although UK equities rose 2% and small caps outperformed large caps. Energy led the market with a 20% gain, while real estate was the weakest sector, falling 10%. Dividend and buyback strategies were the best performing factors. Bond yields rose across the continent, with French government bonds falling 6%.

Asia Pacific equities kept pace with global markets, rising 2% despite higher rates and oil prices. Singapore (up 9%, driven by banks) and Indonesia (up 8%) recovered, while South Korea fell 20% after regulators targeted leveraged single-stock ETFs. China declined 8% and ended the quarter near a one-year low. Energy and financials each gained 11%, while technology fell 6%. In fixed income, currency moves split results, with local currency Asian bonds up 1% and US$-denominated bonds down 2%. Commodities were the standout asset class, with broad commodity prices up roughly 25% and crude oil rising as hopes for a quick resolution to Middle East tensions faded. Digital assets also rebounded sharply, surging 45% over the quarter.

South African equities fell sharply in September after a strong August. The FTSE/JSE All Share Index (ALSI) dropped 5.8% as precious metals miners plunged more than 17%, erasing roughly R1.61 trillion in market value. The ALSI ended quarter three down 0.3%. August inflation reached 4.4% and unemployment rose to 33.6%. After holding the repo rate at 7% in July, the South African Reserve Bank raised it by 25 basis points to 7.25% in September, citing inflation risks from the energy shock, a weaker rand and a looming El Niño drought. The rand gained 2% in August to R16.17 per dollar but slipped 1.55% to R16.42 in September. Bond markets came under pressure as the FTSE/JSE All Bond Index contracted by 0.7% for the third quarter of 2026.

The broad market South African equity exposure in the fund is primarily through an allocation to the FTSE/JSE Capped All Share Index (Capped ALSI), which is intended to be a fairer reflection of the investment universe available to a South African investor. The Capped ALSI strategic weight is 30%. It detracted -0.29% for the quarter ending September 2026. Basic materials and healthcare returns were the best performing sectors within the index returning 15.64% and 2.38% respectively. The worst performing sectors were telecommunication (detracting by -17.91%) and technology, returning -12.02%. The index is rebalanced on a quarterly basis in March, June, September and December.

In addition to the broad local equity market exposure, the fund also has exposure to South African property, which has a strategic weight of 2.5%. The FTSE/JSE All Property Index returned -1.47% for the quarter ending September 2026.

The international equity exposure is invested in the MSCI All Country World Index (ACWI), which has a strategic weighting of 25%. The MSCI ACWI offers exposure to both developed and emerging markets globally and returned 1.67% in US dollar terms for the quarter. The rand depreciated against the US dollar by 0.19% over the quarter.

To diversify away from equity, the fund invests in nominal bonds through exposure to the FTSE/JSE All Bond Index (ALBI) which has a strategic weighting of 25%. The ALBI returned -0.68% for the quarter. In addition to the nominal bond exposure, an allocation is also made to inflation-linked government bonds through exposure to the JSE Inflation-Linked Government Index, which has a strategic weight of 5%. This index returned 1.44% for the quarter.

The fund is positioned to gain asset class exposure through indexation building blocks. The underlying building blocks are aimed at replicating the returns of each index asset class.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	0.50%	0.25%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, include audit, custodian and trustee charges and service fees of collective investment schemes in which the fund holds interests. These are included in the TER.

	36 Months		12 Months	
Total Expenses (Incl. Annual Service Fee) (30/06/2026)	**Class A**	**Class B1**	**Class A**	**Class B1**
Total Expense Ratio (TER) Incl. VAT	0.76%	0.48%	0.72%	0.44%
Transaction Cost (TC)	0.08%	0.08%	0.08%	0.08%
Total Investment Charge	0.84%	0.56%	0.80%	0.52%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

OLD MUTUAL CORE MODERATE FUND

MINIMUM INVESTMENTS

LOW BALANCE CHARGE

Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge* of R31 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, the Low Balance Charge will not apply. Please refer to the link for a full disclosure on how the Low Balance Charge will apply to your investments.

* This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

INITIAL CHARGES (Excl. VAT):

Initial adviser fee will be between 0% and 3.00%.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Multi-Managed Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 September 2026. Source: Morningstar.
