Date	Dividend	Interest	Total	Total %
30/06/2026	1.67c	5.47c	7.14c	1.68%
31/12/2025	1.05c	4.28c	5.33c	1.26%

* Class A fund distributions

TAX REFERENCE NUMBER:

3256/537/18/8

CODES	JSE	ISIN
Class A	OMSGA	ZAE000097770
Class B1	OMGCB	ZAE000097788

FUND OBJECTIVE

The fund aims to outperform inflation and provide a modest level of income while aiming not to lose money over any 18-month period. The portfolio manager actively manages asset allocation to take advantage of changing market conditions.

WHO IS THIS FUND FOR?

This fund is suited to investors who want their investment to grow in real terms and deliver a moderate level of income, with controlled risk of capital loss in the short term. It is typically suited to investors close to, or in retirement.

INVESTMENT MANDATE

The fund invests in cash, bonds, property and shares. The fund may invest up to 40% of its portfolio in equities. The fund may also gain exposure to foreign assets up to a maximum of 45% (including Africa) of its portfolio. Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

WARREN VAN DER WESTHUIZEN

- BCom (Hons), CFA
- 26 years of investment experience

The Middle East war and its inflation fallout dominated the quarter. Brent crude returned above US$100 a barrel, European gas stayed above €70/MWh for most of September, and Washington announced a fresh wave of tariffs. A global bond sell-off intensified through the quarter as oil, hawkish central banks and heavy government issuance collided. The US 10-year Treasury yield rose from about 4.4% at the start of the quarter to 5.27% at its peak, its highest level since 2007. Bond yields around the world rose: 10-year yields in Japan, Germany and the UK reached their highest levels since 1996, 2011 and 2007 respectively. Central bank policy turned decisively hawkish. The US Federal Reserve (Fed) held in July but hiked by 25 basis points to 3.75%-4% in September, a unanimous decision and the first hike under new Fed Chair Kevin Warsh. The Bank of Japan and the European Central Bank also hiked rates, while the Bank of England held at 3.75%. The South African Reserve Bank raised its repo rate to 7.25%, citing inflation above its 3% target, rising global rates and intensifying oil price pressure.

Despite rising long-dated bond yields and hawkish central banks, global equities remained buoyant, supported by resilient earnings. In rand terms, they returned 1.7% over the quarter, outperforming global bonds (-2.4%), local equities (-0.3%) and local bonds (-0.7%). Within local asset classes, cash and inflation-linked bonds outperformed local bonds and equities. Local equities fell marginally over the quarter, but this masked considerable volatility, especially in mining shares. Precious metal miners rallied strongly in August on higher gold and platinum prices, then fell sharply in September. Outside the resource sector, weakness was broad-based, with index heavyweight Naspers falling sharply on weakness in Tencent. The rand and bonds weakened during the quarter as rising global yields and oil prices took their toll with the South African 10-year bond yield rising from 8.4% to 9% over the quarter.

The fund has returned 6.3% over the last year with a negative return in the last quarter. Over the longer term the fund continues to deliver to its real return target of CPI + 2-3% net of fees. During the quarter the funds allocation to local equities and bonds detracted from returns with both asset classes posting negative returns in the quarter. The fund's allocations to cash, inflation-linked bonds and global equities posted positive returns in the quarter. During the quarter the fund's local equity underperformed the FTSE/JSE Capped All Share Index driven by underweight positions in gold and platinum miners, which despite pulling back in September, enjoyed strong gains over the quarter.

Looking forward the fund continues to see South African assets as relatively attractively priced compared to global assets. This is reflected in our allocation to both local bonds and local equities. While local assets face continued headwinds from the US/Iran war and its impact on oil prices, inflation and interest rates we believe that the fundamentals for South African bonds are attractive with the SARB committed to lower inflation to 3% and Treasury committed to stabilising South Africa's debt-to-GDP ratio through sustained primary budget surpluses.

While the near-term outlook for inflation is contingent on oil prices, we expect inflation to fall as we move through 2027. This should improve the outlook for domestic bonds, and we have marginally trimmed out allocation to inflation-linked bonds, which have performed well, and added to nominal bonds. Within equities we continue to favour exposure to high-quality global defensive business like Anheuser-Busch InBev and maintain our position in Naspers and Prosus, which have derated alongside Tencent.

Globally we maintain our underweight to global bonds, which have underperformed in the face of elevated inflation and rising concerns about the sustainability of the fiscal path in many developed economies including the US. In this context the fund is running with a relatively elevated exposure to global cash including currency derivative exposure to the US dollar as a hedge against downside risks.

OLD MUTUAL STABLE GROWTH FUND

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	1.30%	0.95%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. These include the fees and costs relating to underlying global asset class exposures, which range between 0.20% and 0.50% as the fee for equity exposures is typically higher than the fee for fixed income or money market exposures. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

	36 Months		12 Months	
Total Expenses (Incl. Annual Service Fee) (30/06/2026)	**Class A**	**Class B1**	**Class A**	**Class B1**
Total Expense Ratio (TER) Incl. VAT	1.57%	1.17%	1.58%	1.18%
Transaction Cost (TC)	0.08%	0.08%	0.11%	0.11%
Total Investment Charge	1.65%	1.25%	1.69%	1.29%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

MINIMUM INVESTMENTS

LOW BALANCE CHARGE

Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge* of R31 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, the Low Balance Charge will not apply. Please refer to the link for a full disclosure on how the Low Balance Charge will apply to your investments.

* This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

INITIAL CHARGES (Excl. VAT):

Initial adviser fee will be between 0% and 3.00%.

OLD MUTUAL STABLE GROWTH FUND

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Multi-Managed Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 September 2026. Source: Morningstar.

Old Mutual Investment Group (Pty) Ltd (FSP 604) is a Licensed Financial Services Provider. www.oldmutualinvest.com

Old Mutual Unit Trust Managers (RF) (Pty) Ltd, registration number 1965 008 47107, is a registered manager in terms of the Collective Investment Schemes Control Act 45 of 2002. Old Mutual is a member of the Association for Savings and Investment South Africa (ASISA). Old Mutual Unit Trust Managers has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.
