OLD MUTUAL DYNAMIC FLOOR FUND

FUND INFORMATION

RISK PROFILE

RECOMMENDED INVESTMENT TERM

BENCHMARK:

CPI

PERFORMANCE TARGET:

CPI + 3% to 4% p.a. (net of fees)

Performance is targeted over the recommended minimum investment term and is not guaranteed.

RISK OBJECTIVE:

The fund aims to protect at least 90% of the net investment over a 12-month period.

ASISA CATEGORY:

South African – Multi-Asset – Medium Equity

FUND MANAGER(S):

Hanno Niehaus & Sehrish Khan
(Old Mutual Investment Group)

LAUNCH DATE:

01/11/2002

SIZE OF FUND:

R1.9bn

DISTRIBUTIONS: (Half-yearly)*

Date	Dividend	Interest	Total	Total %
30/06/2026	0.80c	9.80c	10.60c	1.72%
31/12/2025	1.04c	8.05c	9.09c	1.49%

* Class A fund distributions

TAX REFERENCE NUMBER:

1892/649/19/3

CODES	JSE	ISIN
Class A	DYFF	ZAE000043253
Class B1	DYFB	ZAE000043337

FUND OBJECTIVE

The fund strives for long-term capital growth as well as some level of capital protection. Through the use of a quantitative risk model, the fund aims to profit from a rising share market and protect against capital losses in a weak market.

WHO IS THIS FUND FOR?

This fund is suited to investors who strive for long-term capital growth as well as some level of capital protection.

INVESTMENT MANDATE

The fund invests across shares, bonds and cash and may gain exposure to foreign assets up to a maximum of 45% of its portfolio – moving from shares into fixed interest investments when the fund's value drops below a predetermined "floor". When markets start to move up, the fund increases its holdings in shares, tapping into these growth opportunities. Derivatives may also be tactically used to manage and limit downside risk and to capture or lock in gains as and when they occur.

REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

SEHRISH KHAN

- B. Com (Acc), CA(SA), CFA Charterholder
- 12 years of investment experience

The Middle East war and its inflation fallout dominated the quarter. Brent crude returned above US$100 a barrel, European gas stayed above €70/MWh for most of September, and Washington announced a fresh wave of tariffs. A global bond sell-off intensified through the quarter as oil, hawkish central banks and heavy government issuance collided. The US 10-year Treasury yield rose from about 4.4% at the start of the quarter to 5.27% at its peak, its highest level since 2007. Bond yields around the world rose: 10-year yields in Japan, Germany and the UK reached their highest levels since 1996, 2011 and 2007 respectively. Central bank policy turned decisively hawkish. The US Federal Reserve (Fed) held in July but hiked by 25 basis points to 3.75%-4% in September, a unanimous decision and the first hike under new Fed Chair Kevin Warsh. The Bank of Japan and the European Central Bank also hiked rates, while the Bank of England held at 3.75%. The South African Reserve Bank raised its repo rate to 7.25%, citing inflation above its 3% target, rising global rates and intensifying oil price pressure.

Despite rising long-dated bond yields and hawkish central banks, global equities remained buoyant, supported by resilient earnings. In rand terms, they returned 1.7% over the quarter, outperforming global bonds (-2.4%), local equities (-0.3%) and local bonds (-0.7%). Within local asset classes, cash and inflation-linked bonds outperformed local bonds and equities. Local equities fell marginally over the quarter, but this masked considerable volatility, especially in mining shares. Precious metal miners rallied strongly in August on higher gold and platinum prices, then fell sharply in September. Outside the resource sector, weakness was broad-based, with index heavyweight Naspers falling 15%. The rand had a volatile quarter, strengthening below R16/US$ in August and then weakening again to end September above R16.4/US$. The South African 10-year government bond yield rose from 8.4% to 9% over the quarter as rising global yields and oil prices took their toll.

As equities retreated, particularly on the local side during September, the fund's risk budget shrank, and in response, we reduced effective equity exposure from 34% at the start of July to 28% by the end of the quarter. While the fund's equity options expired in September, our focus on risk management and daily applied dynamic hedging process will help to limit losses in the fund if a broad market sell-off ensues. The absence of developed market bonds in the fund has been beneficial to returns given that yields have sold off sharply, and in its place, the fund maintains a sizeable allocation to local fixed income.

We added to local nominal bond exposure as yields rose because they offer an attractive real yield despite elevated inflation. We also took profit on a small portion of inflation-linked bonds given strong performance and moderating inflation carry. Post September option expiry, we bought USD/ZAR currency options to help manage US dollar exposure and protect the fund from losses in the face of continued rand strength.

With global equity valuations elevated and the durability of the AI-led rally still to be tested, the fund's dynamic hedging process will continue to guide its equity exposure as market conditions change. Our aim remains to limit downside risk in the near term, while building inflation-beating returns over time.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

	Class A	Class B1
Annual service fees (excl. VAT)	1.35%	1.00%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, include audit, custodian and trustee charges and service fees of collective investment schemes in which the fund holds interests. These are included in the TER.

	36 Months		12 Months	
Total Expenses (Incl. Annual Service Fee) (30/06/2026)	**Class A**	**Class B1**	**Class A**	**Class B1**
Total Expense Ratio (TER) Incl. VAT	1.72%	1.31%	1.73%	1.33%
Transaction Cost (TC)	0.15%	0.15%	0.17%	0.17%
Total Investment Charge	1.87%	1.46%	1.90%	1.50%

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

OLD MUTUAL DYNAMIC FLOOR FUND

MINIMUM INVESTMENTS

LOW BALANCE CHARGE

Effective from 31 March 2025, a Prescribed Minimum Balance of R10 000 per fund per investment contract will apply. Failure to maintain the Prescribed Minimum Balance in any such fund will result in a Low Balance Charge* of R31 per month excluding VAT being incurred. However, if there is an existing monthly debit order of a minimum of R500 into each underlying fund within your investment contract, the Low Balance Charge will not apply. Please refer to the link for a full disclosure on how the Low Balance Charge will apply to your investments.

* This charge will not apply if investing via investment platforms such as Old Mutual Wealth.

INITIAL CHARGES (Excl. VAT):

Initial adviser fee will be between 0% and 3.00%.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Multi-Managed Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 September 2026. Source: Morningstar.

Old Mutual Investment Group (Pty) Ltd (FSP 604) is a Licensed Financial Services Provider. www.oldmutualinvest.com

Old Mutual Unit Trust Managers (RF) (Pty) Ltd, registration number 1965 008 47107, is a registered manager in terms of the Collective Investment Schemes Control Act 45 of 2002. Old Mutual is a member of the Association for Savings and Investment South Africa (ASISA). Old Mutual Unit Trust Managers has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.
