INVESTMENT DESCRIPTION

The Global Managed Alpha Equity Portfolio aims to generate a total return that outperforms the equity market by systematically exploiting behavioural biases through investing in the themes that are current market drivers. It provides investors with an alternative source of both alpha and diversification compared to traditional fundamental approaches. The Portfolio aims to outperform the MSCI All Country World Index by 2.0% p.a. over the medium to longer term.

INVESTMENT STRATEGY

We evaluate and determine the relative attractiveness of shares through the systematic analysis of fundamental, risk, economic and market data. We have pioneered an approach that dynamically weights our exposure to the identified themes driving the markets at a point in time, allowing us to tilt our portfolios accordingly. This enables us to take advantage of structural anomalies in the market caused by emotions such as overconfidence, fear and greed. The strategy can be applied to any published index.

SUITABLE INVESTORS

Retirement funds, corporates, asset aggregators, medical aids

- With a time horizon greater than 3 years
- And a moderate risk profile in an equity context
